

Introducing The **New Walking Leash Shoulder Straps** and **Walking Leash Handle with Loop Connectors**.

Left:
This is the new Walking Handle with a **Loop Connector**. The old handle used to slide side to side a bit, so we redesigned it with a loop connector. Now it locks onto the handle.

Right:
All of our Walking Handles and Walking Leash / Shoulder Straps will now come with this version of the loop connector.

Loop Connector

Left:
This is the **Loop Connector**. The old handle used to slide from side to side - so we created the loop connector so that it locks onto the handle, like this!

Below:
Follow our easy instructions below to learn how to attach this great new device!

Locked onto the handle

1
Connect the connecting clip to the front "D" ring.

1.5
Detail of connecting to the front "D" ring.

2
Now disconnect the fastener to the back half.

3
Pass the clip under the back handle.

4
Pull the clip through the loop.

5
Bring it up to reconnect with the Front half of the leash or handle. Pulling on it will lock it in place. You're on your way!
